

ANTIMICROBIAL PROTECTION

Steelscape is the market leader in high-quality metallic-coated and pre-painted steel.

Dazzle® coated steel is NSF/ANSI 51 certified for food equipment materials.

Antimicrobial Protection

Blending the versatility of steel with technology, Steelscape's Dazzle coated steel features a high-performance clear coating formulated with antimicrobial protection which shields coated steel surfaces from the growth of bacteria, mold, and mildew which can cause stains, odors, and degradation of the surface. Dazzle coated steel has been certified by the National Sanitation Foundation (NSF) International as complying with NSF/ANSI 51 for Food Equipment Materials. NSF International is a leading third party certifying organization which has set public health standards across the globe.

Dazzle coated steel has a radiant gloss, tinted resin coating and is available in six standard colors offering you options to create exceptional designs.

Dazzle coated steel is ideal for interior applications where antimicrobial protection of a surface is critical, such as:

- Food Services
- Hospitals
- Schools
- Laboratories
- Airports

Steelscape's Dazzle coated steel offers a solution which protects your investment without compromising your design.
