° **BARE COIL:** Widths in the 26" - < 31" range must have a minimum order size of 35K lbs. with additional order increments of 35K lbs. Widths in the 31" - <35" range must have a minimum order size of 40K lbs. with additional order increments of 40K lbs. Widths in the 35" - 38" range must have a minimum order size of 45K lbs. with additional increments of 45K lbs. Please note that we do have significant quantities of steel sourced that have order increments smaller than this stated guideline. We will make every effort to match the quantity you require, but may need to make order quantity adjustments for items using this supply chain.

~ **PAINTED COIL:** Painted steel orders must utilize an entire hot roll coil, based on the bare product width ranges provided above (see the ° footnote). The minimum order size for painted steel is ½ the bare order size IF accompanied by a second order of painted product for the same specification using the remainder of the hot roll coil.

^ If vertical, skidded max weight is 12,500# in Rancho and 15,000# in Kalama.

* For TruZinc and ZINCALUME Steel, .0356 & > is considered non-surface critical. Consult your Steelscape Account Manager for details.

+ Resin coated and mill-applied coated product lead times may vary based on accumulation of a minimum tonnage requirement.

‡ For painted steel thickness >.030", consult your Steelscape Account Manager. Paint systems and color MUST be pre-approved by Steelscape Quality Systems prior to order.

Please reference Steelscape's website, www.steelscape.com, for full offer details on both bare and painted product.

STANDARD PRODUCT OFFER

Steelscape designed the Standard Product Offer to streamline and categorize their many products into frequently requested offerings. This offer maximizes Steelscape's ability to reliably and quickly process customer orders and deliver quality metallic-coated and painted steel products. The Standard Product Offer also allows Steelscape to effectively serve customer needs and deliver superior service.

The Product Offer groups products according to coil thickness, width, metal coating type and product grade. This grouping targets our customers' inventory management, product range and purchasing needs. The offer is a robust selection with very competitive lead-times. Please inquire for products not listed.

This diagram illustrates Steelscape's Standard Product Offer and is subject to change. Steelscape welcomes "trial orders" on a conditional basis.
